

Miro Street Panel Beaters

New Zealand

Miro Street Panel Beaters have it covered when your pre-loved vehicle is in need of restoration and repair! Specialising in panel beating, spray painting, custom works, fibreglass, rust repairs and classic American car restoration since its inception in 1988.

This 1978 Toyota Corolla 13B Rotary came in worse for wear. Every panel was dented or rusted resulting in a lot of time blocking and welding prior to painting. Miro Street Panel Beaters used Mirotone's range of automotive premium grade coating paint to bring it back to its former glory.

MIROTHANE PU 5610 Pigmented Topcoat in a high gloss finish was used for its superior coverage and excellent durability on a wide variety of metal articles used in the automotive market, truck body building, camper vans and waste recycling trucks.
