Architectural Style:  
Deconstructivism - Post Modern  
Structure

Opened: 2013

Photography: John Gollings

The National Museum of Australia is a social history museum that explores the key issues, people and events that have shaped Australia. The National Museum of Australia is located on an 11 hectare site on the shores of Lake Burley Griffin in Acton, Canberra, just outside the city centre. The administration building extension was completed in 2013 by the original architects, ARM Architecture.

Mirotone coatings were used on the administration building extension project with *MIROSTAIN* white limed stained panels on the walls and ceiling and green stain on the wall cladding and floor of the café. *MIROSTAIN* black stained panels were also used in the reception area.
