

# Supreme Court Wellington

Wellington,  
New Zealand

## Project Information

Client: The Ministry of Justice

Project Value: \$80.7 million

Architects: Warren & Mahoney  
Architects

Architectural Style: Renaissance  
Revival Style (Traditional &  
Environmentally Sustainability)

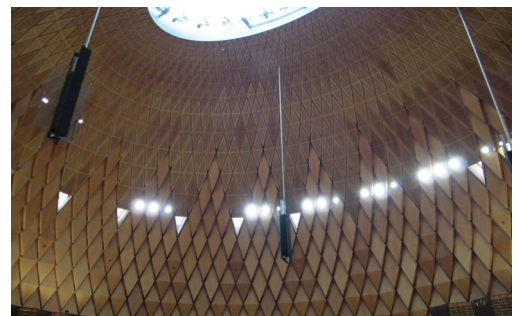

Opened: 2011

The Supreme Court building in Wellington was completed in 2011. Mirotone worked with the main contractor involved in the project, Ferndale Furniture Ltd, who manufactured and coated various furniture and fittings for the interior of the courthouse. Cooper Furniture and Joinery were also involved in the project producing some of the fittings for the project.

The Architects specified a *MIROTEC WB* water based coating system to coat the Victorian Ash timber which is used for the majority of the furniture and fittings. *MIROTEC WB 8022* Sealer and *MIROTEC WB 8060* Topcoat both have very low VOC content which made them ideal for this project – the building was required to have a Sustainability Certificate i.e. a Green Star Rating. Using this *MIROTEC WB* water based coating system Ferndale was able to show certification that the product met the requirements.

There are approximately 4 km's of Victorian Ash Timber shelving used in the Supreme Court Library, all finished in *MIROTEC WB* water based coatings.
